CORE COMPETENCIES

Software Development Lifecycle

Agile Development

Design/ Coding/ Testing

Project Execution

Defect Resolution

Requirement Gathering & Analysis

Technical/ Functional Documentation

Cross-functional Coordination

Client/ Stakeholder Engagement

TECHNICAL SKILLS

- Java
- Spring Boot
- Microservices
- Java Script
- AWS
- Docker
- MySQL, SQL

EDUCATION

- **MCA** from New Horizon College of Engineering, Bengaluru in 2022

PERSONAL DETAILS

Date of Birth: 7th November 1999
Languages Known: English, Hindi, Kannada & Telugu

PROFILE SUMMARY

- A competent professional with **nearly 2 years** of work experience in **Software Development, and Project Management,** with hands-on experience in **Agile Methodology**.
- Expertise in **managing complete SDLC** including design, development, enhancements, customization, requirement gathering & analysis, testing, coding, customer support and training.
- **Project Execution Expert,** led the project execution and management in tune with the core business objectives; reviewed functional requirements and translated the same into technical specifications.
- Hands-on experience in **fixing bugs** in coordination with the team, designing code for enhancement and developing new/ additional features in product.
- **Client-centric professional** with excellence in understanding clients' requirements and designing a roadmap for further product development.
- Hands-on experience in using **Amazon Web Services, Docker, and Linux.**
- An effective team player with capabilities in **maintaining deliverables** as per the defined guidelines along with elevating service standards for operational excellence.

WORK EXPERIENCE

Aug'22-Feb'24: GlobalLogic, Bengaluru as Associate Software Engineer

Key Result Areas:
- Collaborated with a team to design & code custom-built enterprise solutions using Java technologies and frameworks such as Spring, including modules like Spring Boot, Spring MVC, Spring Security, Spring JPA, and more.
- Utilized the Spring framework to create and debug Spring Microservices.
- Connected Microservices with databases like MySQL and Oracle.
- Developed unit tests using JUnit.
- Deployed & configured Git repositories; managed branching, forks, tagging, and notifications.
- Understood development practices in order to make informed decisions, and provided various ideas.
- Mapped client requirements and designed technical solutions to drive product development.
- Provided information related to software bugs & defects by analyzing & summarizing development and service issues.
- Rendered support in Software Development Lifecycle, right from requirement gathering, documentation (functional specifications, technical designs), coding and testing.
- Worked towards documentation, API creation and user interface as per client requirements.
- Assisted in managing projects with respect to cost, resource deployment, time overruns and quality compliance.
- Communicated with the clients & users, mapped & implemented requirements and followed up with them throughout the project lifecycle to ensure full understanding of needs and concerns.
